Vectorian Giotto

Vectorian Giotto is an application that provides the possibility to create Flash animations. It lets you design animated projects by working on a vast amount of graphic tools, in an interactive way, quickly, and in a simple, fun-loving manner. The application is well-organized and visually appealing. In fact, the interface is fully interactive, allowing you to enjoy the creativity of animation in all its forms. It is possible to work in layers and insert different objects, with each step of the animation being displayed. In terms of use, with the help of a sophisticated palette of drawing tools, as well as customization options, you are able to create an unlimited number of objects and draw lines. Moreover, it is possible to freely draw objects and add pictures or text to them. What's more, text and pictures can be selected and inserted into the animation at any time. Furthermore, the application lets you use an innovative graphic grid that lets objects be aligned and snapped to it. In addition, in real time, the window displays the preview of the selected object. Finally, with a customizable template and style, you are able to animate any object and add special effects. Animate any object on your workspace To animate any object on the workspace, Vectorian Giotto lets you add multiple effects, with each object having a distinct animation style. This can be done with multiple animation types, with varying degrees of repetition. With the addition of more than 50 different effects, it is possible to create a unique animation style to emphasize particular objects. This can be done to set a certain object apart from other ones, and, at the same time, make it stand out. What's more, by adding animation to a character, for example, you can make it jump out and emphasize it. At the same time, the application lets you change the character of objects, with a bunch of customizable templates and styles. What's more, the animation can be set up to fit any type of object, such as a short movie, logo, buttons, or even an object inserted into the animation. Animate any object in different ways What's more, the application is able to animate any object in different ways. From simple, light animations to complete object transitions, this can be done in numerous ways. You can use the available collection of animation types for simple and complex movements. These include basic types, such as character, animation, lighting and illustration, along with multiple types of animation (linear, Bouncing, for example). What

What's New in the?

Vectorian Giotto is a powerful and easy to use Flash Animation editor/creator. All parts of the application have been clearly and beautifully displayed, making it easy to use. The applications is very easy to use, and the user interface is very logical. There are 5 groups of tools: - A bright text editor with the possibility to insert text and characters, move them, highlight, copy and paste. - A palette of different shapes and objects - A large image drawing area - A Text area with the possibility to draw text - A diagram editor You can get all of these from the application in a well-designed interface. Vectorian Giotto is so easy to use, that even a beginner with no artistic talents can create great animations. The application also contains a preview window, which is always visible, so you can test your animations in the making. You can either use the application to make a simple and basic movie (5 min.), or you can make a whole movie (50 min.). Vectorian Giotto also includes a tutorial with the

possibility to view a basic tutorial with step by step instructions on how to create an animation. Even experienced users can use this program, to make a complex animation, as it includes a possibility to import both MP3 and WAV audio files. Vectorian Giotto is not limited to Flash movie, as you can also import other objects, like PNG and JPG files. Vectorian Giotto is a fast and professional application, with a powerful object editor, which is easy to use. Vectorian Giotto is fully customizable, as it lets you change the whole appearance of your application, or you can easily change the appearance of your animations. Vectorian Giotto comes with a lot of pre-designed animation templates, which are sorted into the following categories: - Animations - Sprite sheets - Import animations - Standard animations - Transition animations - Photo animations - Effects animations Once you find the animation you would like to create, you can select it and click the Create button. It then gets into a template, from where you can add all kinds of effects, objects and transitions. The object you added will be shown in the preview window. You can then create a new object or change it. And in a jiffy the animation is ready. Use Vectorian Giotto to create your own flash animation and impress your friends If you are looking for an application to create Flash animations, you have reached the right place. Vectorian Giotto is a easy to use and intuitive tool that offers a high level of customization, and allows you to create your own flash movie. With this application, you can create the kind of animation you desire. There are a lot of options that will allow you to customize everything. You can change the color of the objects, transitions, effects, etc. The interface is very well-designed and intuitive

System Requirements For Vectorian Giotto:

Minimum: OS: Windows 7 Processor: Intel Core 2 Duo (2.2GHz) Memory: 2GB RAM DirectX: Version 9.0 Hard Drive: 10GB free space Additional Notes: A good network connection is also recommended. Recommended: OS: Windows 10 Processor: Intel Core i5 or AMD equivalent Memory: 4GB RAM DirectX: Version 11 Additional Notes: A good network connection is also recommended
